This project is made using **HTML, CSS, and JavaScript.**
There are three sections that compose this website:
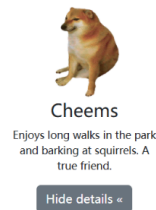

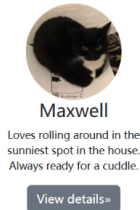

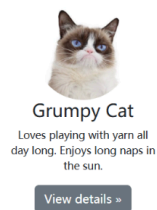

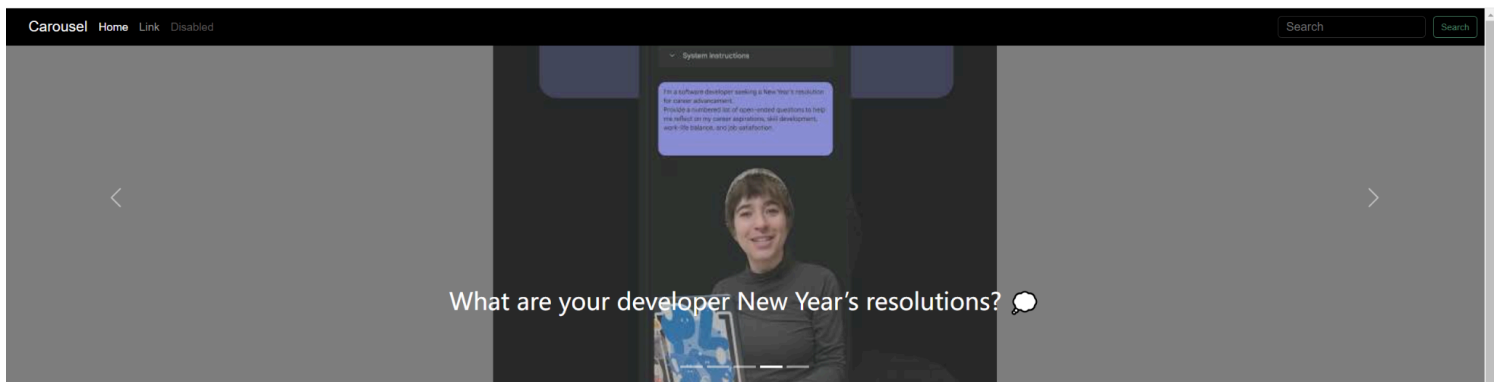

1. The top bar is a simple navigation section, and at the bottom is the carousel section. It is built using the YouTube API, which selects the most popular videos from specific authors. The video content may change dynamically as it reflects the real-time popularity rankings.
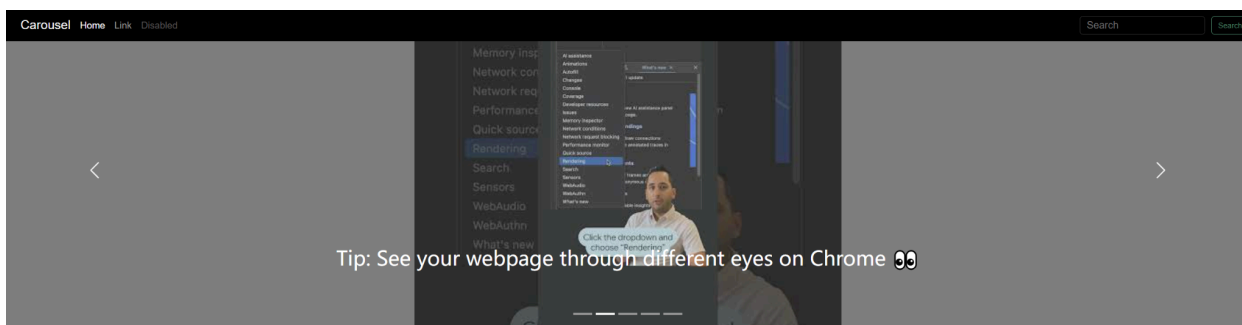

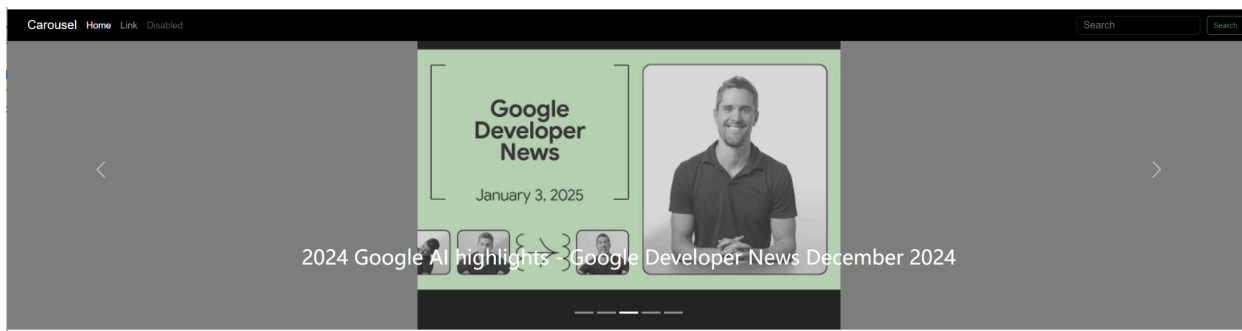

1) In the second part, I use JavaScript to introduce three characters. Each character has a brief paragraph describing them, and the text is displayed randomly. Every time you refresh the webpage, you will see different text.
Additionally, when you click the "View Details" button, an iframe window will open, directly displaying the Wikipedia page of the character.

Grumpy Cat

Loves playing with yarn all day long. Enjoys long naps in the sun.

View details »

Maxwell

Loves rolling around in the sunniest spot in the house. Always ready for a cuddle.

View details»

Cheems

Enjoys long walks in the park and barking at squirrels. A true friend.

Hide details «

Grumpy Cat

Has a keen sense of smell and always finds hidden treats. Loves chasing.

View details »

Maxwell

Enjoys staring out the window for hours. A fan of the occasional bird chase.

View details»

Cheems

Loves chasing after the ball and running in circles. Always ready for a belly rub.

View details»

2) This part just shows the picture of each character and when the cursor hovers above the picture, the scale will increase.

Grumpy Cat
Has a keen sense of smell and always finds hidden treats. Loves chasing.

Maxwell
Enjoys staring out the window for hours. A fan of the occasional bird chase.
